NEST GROUPS BY THICKNESS (laser)

2 mm S355JR: 11 ×2, 17 ×1, 18 ×1 | net 0.07 m2 | 1.1 kg

3 mm S355JR: 01 ×1, 02 ×1, 04 ×1, 05 ×2, 12 ×1, 13 ×1 | net 1.11 m2 | 26.0 kg

5 mm S355JR: 03 ×1, 06 ×2, 14 ×1 | net 0.33 m2 | 12.8 kg

8 mm S355JR: 07 ×4 | net 0.02 m2 | 1.2 kg

PROCESS NOTES

1. Laser cut all plate 1:1 from DXF (layer CUT). Layers BEND_UP / BEND_DOWN are bend-line centres - do not cut.
2. Layer ETCH = low-power surface mark (wordmark on centre panel). Layer INFO = reference text only.
3. Flats are developed at K = 0.44 (air bend, mild steel). Re-check first-off against the bend table before batch forming.
4. Deburr all edges; break sharp corners 0.5 mm. Remove dross from 8 mm lugs.
5. Bend direction is viewed from the flat-pattern face shown on each sheet (UP = flange toward viewer).
6. Tube items 8/9/10/15/16 are not in this plate pack - lengths and bend data to come from the 3D model.
7. Items 17/18 (face strips): source drawing states "NO BENDING" yet carries bend notes - confirm with design before forming.
8. Weld sequence: tack brackets (06) to centre (01) and P2/P3 (12/13); fit uprights (03/14) and lugs (07); add ends (02/04) and end plates (05) last.
